ULTRASOUND

QUANTEL MEDICAL

ABSolu®

A/B/S/UBM ULTRASOUND PLATFORM

- Annular 5-ring 20 MHz B probe
- Enhanced UBM technology
- B and UBM probes equipped with a position sensor IMUv™
- DICOM imaging with full HD screen
- Standardized A mode for tissue characterization
- **Optional STS module** allows an automatic measurement of the sulcus-to-sulcus, lens curvature and anterior chamber depth.

LEARN MORE

CompactTouch®

A/B/P ULTRASOUND PLATFORM

- New generation 15 MHz B probe with a resolution increased by 30%
- DICOM, EMR, WIFI compatible
- Ultra-compact and ergonomic design
- A-Scan Probeam™ with laser fixation point to ease measurement acquisition

ULTRASOUND

AXIalis

BIOMETER AND PACHYMETER

- Biometry: 12 IOL calculation formulas, including for post-refractive surgery patients
- Pachymetry (optional): Multiple measurement modes, accurate to ± 5 µm
- Connectivity: DICOM and EMR compatible
- Ergonomy: Compact, integrated design without compromising comfort of use

NEW

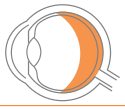

Pocket III

HANDHELD PACHYMETER

- 30 MHz probe: extended measurement range from 150 to 1200 µm
- Compact, ergonomic and light
- Connection: Bluetooth or USB-C
- Exclusive holder with a cup for disinfecting compliance.

LEARN MORE

RANGE OF ULTRASOUND B PROBES		
PROBE	IMAGE	CLINICAL USES
15 MHz		• High resolution eye and orbit examination • B Mode biometry
Annular 20 MHz		• Annular 5-ring technology • Simultaneously examination of the vitreous, the retina and beyond in high resolution • B Mode biometry
50 MHz linear		• UBM examination of anterior segment and the structures behind the iris
