**KIT FOR THE PREPARATION OF ALIQUOTS OF EYE DROPS
WITH FRESH AUTOLOGOUS HEMOCOMPONENTS.
SYSTEM FOR HEMOCOMPONENTS PREPARATION
AND PRESERVATION.**

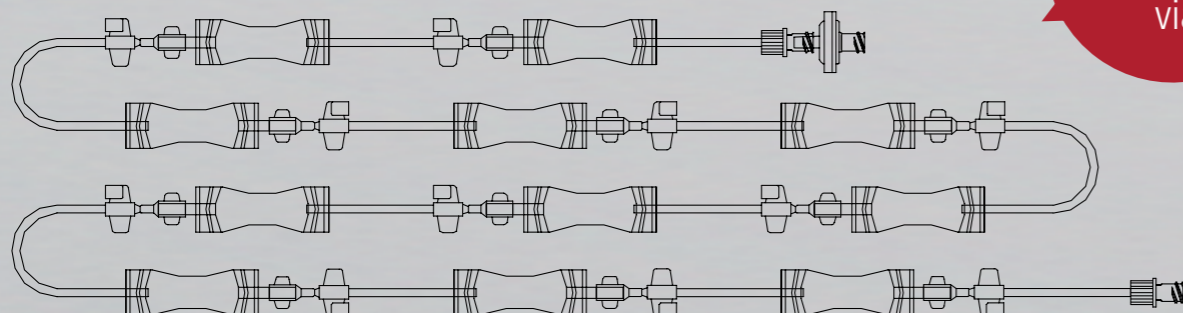

COL is the result of the experience and long-term research activities of Biomed Device. COL allows for the preparation of aliquots of eye drops using fresh autologous hemocomponents (serum, platelet-rich plasma (PRP), platelet concentrate, auto serum, serum eye drops). It is a closed-circuit, pre-connected and sterile kit that is very practical to use. **Each technical detail has been especially designed to fulfil the requirements of hospital workers in the most simple and fast manner.**
