# What is Allotex TransForm™

A gentle science-backed enhancement crafted with natural collagen to restore your near vision. Natural approach, safe at every step, and proven results – Allotex TransForm™ redefines how you see and experience the world.

*Allotex TransForm™  
empowers you to see and enjoy  
life's details again with the  
clarity and confidence of your  
20s, from the very first day and  
for years to come.*

A photograph of two women in a kitchen. The woman on the left has blonde hair and is wearing a light-colored cardigan over a white top and a grey apron. She is looking down at a tablet held by the woman on the right. The woman on the right has brown hair in a braid and is wearing a white t-shirt and a brown apron. They are both smiling and looking at the tablet. In the background, there are white kitchen cabinets and a window. In the foreground, there is a stainless steel pot on a stove and a glass of milk.

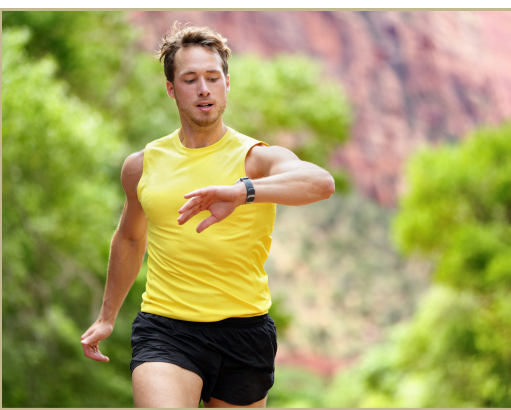

# Is Allotex TransForm™ for you?

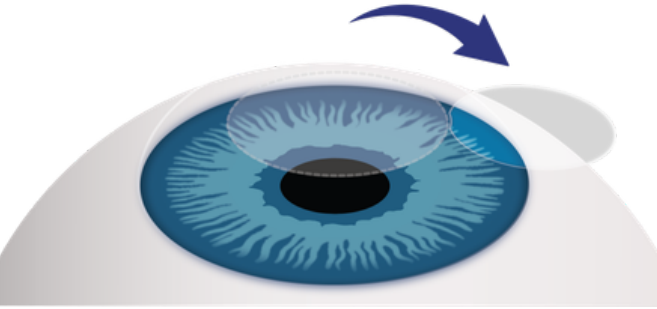

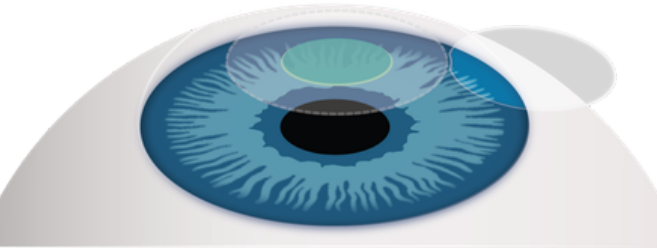

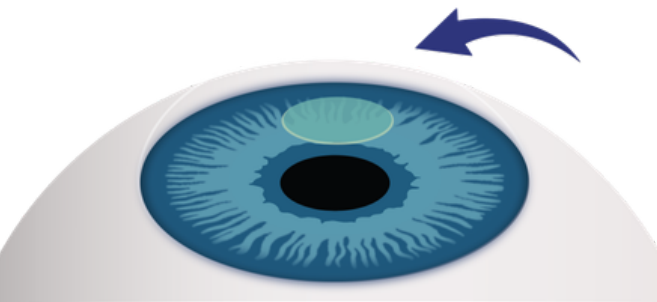

Bring back the way you used to see the world – clearly, naturally and confidently. Because it's not just about restoring near vision – it's about confidence, rediscovery, and freedom:

- ✓ Confidence without interruption
- ✓ Vision that keeps up with you
- ✓ Freedom in the details that matter

Life is made of small moments: reading a message from your loved ones, enjoying your favorite book, checking your smartwatch mid-run. As we reach our 40s, these everyday actions can start to feel less effortless. This natural loss of near vision happens to everyone, even those who have always had perfect vision. But it can be frustrating, especially when it starts to affect little moments that make you feel like yourself.

Allotex TransForm™ helps you see clearly and naturally, without interruptions or compromises. From quiet moments to an active life on the move, your vision keeps up with you. So you can focus on what matters, feeling confident, free, and at ease every day.

# How does Allotex TransForm™ work

The procedure is scientifically validated, minimally invasive, and performed under topical, eye-drop anesthesia. A gentle addition of a collagen layer works in harmony with your eye, enhancing its natural structure without removing any existing tissue. This unique approach supports a smooth recovery, allowing you to return quickly to reading, working, and enjoying everyday life with renewed clarity.

**01**

- A Flap is created on your eye's surface using Laser Technology.

**02**

- The collagen implant is carefully positioned above your pupil.

**03**

- The Flap is closed, allowing natural healing and fast recovery.

# Why Allotex TransForm™

## Natural

The gentle addition of the collagen implant allows for a seamless integration with your eye, leading to a natural enhancement of your eye's natural structure and function.

## Safe

Allotex TransForm™ offers a safe and comfortable path to visual enhancement. Designed to preserve the eye's structure, it is adaptable through time, making your vision future-proofed by leaving your eyes fully open to any future treatments or changes.

## Proven

A lasting companion for your vision, delivering stable, refined performance over time. Supported by peer-reviewed publications and recognized by the global scientific community, it is trusted by patients, doctors, and clinics worldwide.

Laura C.

*“Once I understood the process, I felt in control.”*

Like many people, I approached the procedure with caution and a few doubts. Learning that Allotex TransForm™ is an additive technique and preserves the eye’s natural structure made a real difference for me.

Every step of the journey felt controlled and calm, and much simpler than I had imagined. Looking back, the anticipation was more challenging than the treatment itself. In the end, it felt like a very natural decision.

Mark M.

*“I was back to my normal life faster than expected.”*

I was primarily focused on recovery time and continuity with daily life. What stood out to me was how smooth the experience was. The treatment itself only took a few minutes, and recovery felt natural and easy to manage.

The procedure was comfortable, recovery was smooth, and I was able to return to my routine quickly, feeling supported at every step.

Ana R.

*“I felt confident knowing my eyes were carefully evaluated before anything else.”*

I wasn’t sure at first whether I would even be eligible, especially given my eye history. What reassured me was knowing that everything was carefully evaluated by the clinical team, step by step, before any decision was made.

It was comforting to know that my eyes were being looked at as a whole, with attention to both the present and the long term.

*“It doesn’t feel  
like a change, but  
like getting  
something back.”*

*If you would like to learn more about Allotex TransForm™ and understand whether it may be suitable for you, please consult the clinical team at one of our partner clinics.*
